Executive Summary	ES-1
Introduction.....	ES-1
Study Authorization	ES-1
Sites Project Authority	ES-3
Public Involvement	ES-4
Project Purpose and Planning Objectives	ES-5
Need for Study	ES-5
Purpose Statement and Planning Objectives for the Feasibility Study.....	ES-5
Reservoir Location and Conveyance Measures	ES-6
Evaluation of Reservoir Locations.....	ES-7
Evaluation of Conveyance Systems for Diversions and Releases	ES-7
Development of Alternatives	ES-7
No Project Alternative	ES-12
Cooperative Operations for Action Alternatives	ES-12
Ownership	ES-19
Contracts	ES-19
Water Rights	ES-20
Summary of Alternative Features	ES-22
Estimated Physical Accomplishments	ES-22
Releases from Sites Reservoir for Water Supply and Environmental Purposes.....	ES-22
Water Supply and Water Supply Reliability.....	ES-23

Contents

Incremental Level 4 Refuge Water Supply.....	ES-26
Populations of Anadromous Fish and Other Aquatic Species	ES-26
Delta Water Quality Improvement.....	ES-29
Sustainable Hydropower.....	ES-31
Recreation	ES-31
Flood-Damage Reduction	ES-31
Estimated Benefits and Costs.....	ES-32
Summary of Potential Environmental Effects	ES-35
Plan Evaluation and Comparison.....	ES-35
NED Account.....	ES-35
RED Account	ES-36
EQ Account.....	ES-36
OSE Account	ES-39
Criteria for Alternative Evaluation	ES-39
Project Feasibility	ES-40
Technical Feasibility.....	ES-40
Environmental Feasibility.....	ES-41
Economic Feasibility	ES-41
Financial Feasibility.....	ES-42
Risk and Uncertainty.....	ES-48
Federal Interest.....	ES-51
Cooperative Operations	ES-51
Licensing for Hydropower Facilities	ES-51
Feasibility Report – Next Steps	ES-52
Technical Feasibility.....	ES-52

Environmental Feasibility	ES-52
Economic Feasibility	ES-52
Financial Feasibility	ES-52
Approvals and Funding	ES-52
Feasibility Report Approval	ES-53
Funding	ES-53
Cost-Share Partners	ES-53
Post-Authorization Activities	ES-53
Indian Tribe Consultation and Coordination	ES-53
Environmental Compliance and Regulatory Requirements	ES-53
Coordination and Outreach	ES-56
Pre-Construction Activities	ES-56
Implementation	ES-57
Timeline	ES-57
Chapter 1 Introduction	1-1
Purpose Statement for Study	1-3
Study Authorization	1-3
Federal Authorization for Feasibility Investigation	1-3
Department of Water Resources and State Authorization for Feasibility Investigation	1-5
Sites Project Authority	1-5
California Water Commission and Water Storage Investment Program	1-6
Water Infrastructure Improvements for the Nation Act	1-7
Guidance in the CALFED ROD	1-7
Feasibility Study Process	1-8
Public Scoping	1-10

Contents

Study Area	1-11
Extended Study Area	1-11
Secondary Study Area.....	1-12
Primary Study Area.....	1-12
Considerations in the Project Setting.....	1-12
Organization of the Feasibility Report.....	1-13
Chapter 2 Problems, Needs, and Opportunities	2-1
Identification Process.....	2-1
CALFED Record of Decision.....	2-1
Public Scoping	2-1
California Water Action Plan.....	2-2
Proposition 1, Water Quality, Supply, and Infrastructure Improvement Act of 2014.....	2-3
Sustainable Groundwater Management Act	2-4
Availability of Water for North-of-the-Delta Storage	2-5
Problems, Needs, and Opportunities for the NODOS Investigation	2-6
Water Supply and Water Supply Reliability.....	2-6
Incremental Level 4 Water Supply for Wildlife Refuges	2-10
Sustainable Hydropower Generation	2-11
Survival of Anadromous Fish and Other Aquatic Species	2-13
Water Quality.....	2-16
Recreation	2-17
Flood-Damage Reduction	2-18
Supplemental Flows for Emergency Response.....	2-18
Existing Water Resources Facilities in Study Area	2-19
Central Valley Project.....	2-19

Colusa Basin Drain	2-21
Glenn-Colusa Irrigation District Canal	2-21
State Water Project	2-22
Chapter 3 Planning Objectives and Constraints and the Alternative Development	
Process	3-1
Planning Objectives and Constraints	3-1
Planning Objectives	3-1
National Goals	3-2
California Goals	3-2
Planning Constraints	3-5
Public Outreach Plan.....	3-5
CALFED Evaluation of Statewide Reservoir Locations	3-6
Alternative Development Process.....	3-9
Identification and Evaluation of Measures to Address Primary Planning Objectives.....	3-9
Chapter 4 Potential Offstream Storage Locations	4-1
Reservoir Location Descriptions.....	4-1
Summary of Evaluation of Potential Locations	4-4
Chapter 5 Evaluation of Conveyance and Reservoir Size	5-1
Development of Conveyance Measures.....	5-1
Conveyance from Reservoir to Service Areas or Locations with Various Water Resource Needs and Uses	5-3
Initial Evaluation of Environmental Considerations of the Conveyance Measures ..	5-4
Evaluation of Various Reservoir Sizes	5-6
Conveyance and Reservoir Measures Considered for Further Evaluation	5-7
Chapter 6 Alternative Development	6-1
Previous Facility and Alternative Evaluations.....	6-1

Contents

Sites Reservoir Alternatives.....	6-1
No Action Alternative (NEPA)/No Project Alternative (CEQA).....	6-4
Action Alternatives	6-6
Alternative A (1.3 MAF Sites Reservoir, 2,000 cfs Delevan Pipeline for Intake and Release).....	6-6
Alternative B (1.8 MAF Sites Reservoir, 1,500 cfs Delevan Pipeline for Release Only).....	6-8
Alternative C (1.8 MAF Sites Reservoir, 2,000 cfs Delevan Pipeline for Intake and Release).....	6-10
Alternative D (1.8 MAF Sites Reservoir, 2,000 cfs Delevan Pipeline for Intake and Release, Local Considerations).....	6-12
Facility Descriptions	6-14
Sites Reservoir	6-14
Sites Reservoir Inlet/Outlet Structure (All Alternatives).....	6-15
Tunnel Connecting Inlet/Outlet Structure to Sites Pumping/Generating Plant (All Alternatives)	6-15
Sites Pumping/Generating Plant (All Alternatives).....	6-15
Holthouse Reservoir (All Alternatives)	6-16
Red Bluff Pump Installation at the Pumping Plant (All Alternatives).....	6-17
Terminal Regulating Reservoir (All Alternatives)	6-17
TRR Pipeline (All Alternatives)	6-17
Delevan Pipeline (All Alternatives).....	6-18
Delevan Intake Pumping/Generating Plant (Alternatives A, C, and D)	6-18
Delevan Pipeline Discharge Facility (Alternative B)	6-19
Road Relocations and South Bridge (All Alternatives).....	6-19
Transmission Lines, Electrical Substations, and Switchyards (All Alternatives)	6-19
Recreation Facilities (All Alternatives)	6-20

Proposed Operations	6-20
Chapter 7 Alternative Evaluation.....	7-1
Evaluation of Physical Accomplishments	7-1
Improving System Flexibility, Water Supply, and Water Supply Reliability (Primary Objective)	7-4
Incremental Level 4 Water Supply for Wildlife Refuges (Primary Objective)	7-6
Survival of Anadromous Fish and Other Aquatic Species (Primary Objective)	7-6
Delta Water Quality (Primary Objective)	7-8
Sustainable Hydropower Generation (Secondary Objective)	7-11
Recreation (Secondary Objective)	7-14
Flood-Damage Reduction (Secondary Objective)	7-15
Benefits	7-15
Water Supply and Water Supply Reliability Benefits (Primary Objective)	7-18
Benefits to Incremental Level 4 Water Supply for Refuges (Primary Objective)	7-19
Benefits to Anadromous Fish (Primary Objective)	7-19
Delta Water Quality Benefits (Primary Objective).....	7-20
Hydropower Generation Benefits (Secondary Objective)	7-21
Recreation Benefits (Secondary Objective).....	7-22
Flood-Damage Reduction Benefits (Secondary Objective).....	7-22
Alternative Costs.....	7-23
Feasibility Analysis.....	7-24
National Economic Development Account	7-24
Regional Economic Development Account.....	7-24
Environmental Quality Account	7-27
Other Social Effects Account.....	7-35
Summary of Four Accounts	7-37

Contents

Comparison of Alternatives	7-37
Effectiveness	7-37
Efficiency	7-38
Acceptability	7-39
Completeness	7-39
Chapter 8 National Economic Development and Locally Preferred Alternative	8-1
Determination of Feasibility	8-1
NED Plan	8-1
Technical Feasibility	8-1
Environmental Feasibility	8-2
Economic Feasibility	8-2
Financial Feasibility	8-3
Locally Preferred Alternative (Alternative D)	8-21
Technical Feasibility	8-21
Environmental Feasibility	8-21
Economic Feasibility	8-21
Financial Feasibility	8-21
Preliminary Financial Capability Analysis	8-27
Chapter 9 Risk and Uncertainty	9-1
Climate Change and Sea Level Rise	9-1
Water Supply Reliability and Demands	9-3
Energy Costs Associated with Transporting Water to the South Coast	9-4
Anadromous Fish Populations	9-5
Declining Populations of Aquatic Species in the Delta	9-6
Reducing Risk Through Adaptive Management	9-6

Water System Operations Analysis	9-6
California WaterFix	9-7
Other New Storage Projects.....	9-8
Cost Estimates.....	9-8
Monetizing Project Benefits	9-8
Chapter 10 Findings and Conclusions	10-1
Need for the Project	10-1
Multiple Cost-Effective Plans.....	10-1
National Economic Development Account Plan – Alternative C.....	10-2
Other Principles and Guidelines Accounts	10-2
Costs of the NED and Locally Preferred Alternative	10-2
Benefits of the NED and Locally Preferred Alternative.....	10-3
Feasibility of the NED and Locally Preferred Alternative	10-3
Technical Feasibility.....	10-3
Environmental Feasibility.....	10-5
Economic Feasibility	10-5
Financial Feasibility.....	10-5
Federal Interest.....	10-7
Cooperative Operations	10-8
Licensing for Hydropower Facilities	10-8
Feasibility Report – Next Steps	10-9
Technical Feasibility.....	10-9
Environmental Feasibility.....	10-9
Economic Feasibility	10-10
Financial Feasibility.....	10-10
