

This action item summary is being provided to inform the Boards of the follow-up that has been taken to the requests during April's Reservoir Committee and Authority Board meetings.

Action Item	Status
Operations Modeling – Respond to question about whether salmod results include cumulative effects year over year.	The SALMOD results do not include cumulative effects year over year. Staff is currently assessing whether the other modeling platforms used by the Authority provide this information.
Create “one pager” with the intention of communicating the significant environmental “net” benefit improvement in the project since 2017. Also incorporate how having Sites in 2022 could help with salmon survival this year.	Staff is working to prepare this document. Completion and distribution of this document is planned to occur by end of May 2022.
Evaluate the application of the storage principles and the credit reimbursement policy as it relates to possible voluntary reductions of current participants to “make room” for increased Reclamation participation.	Specific questions raised by participants in this regard have been addressed.
