

This action item summary is being provided to inform the Boards of the follow-up that has been taken to the requests during January's Joint meeting.

Action Item	Status
When looking at conversion to storage allocation, consider extending the analysis to include 2003 to current and how future Delta operations might affect the ability to move Sites water through the Delta.	Although CalSim II only extends through 2003, current Delta operations and requirements are considered for the entire model period of WY 1922-2003. Staff will evaluate options to present information considering recent hydrology.
Bring back a discuss/info item on the allocation of risk as the reservoir approaches deadpool. This should be done before the soft call.	This is scheduled for the April timeframe.
Broaden the outreach to a larger pool of businesses and community groups for the local community working group.	Staff will work with Supervisor Evans and Supervisor Arnold to identify and invite additional groups/businesses to the local community working group
Upon scheduling of first tribal engagement working group meeting in February, notify board members.	Staff is currently working to schedule the first working group meeting and will notify the Board when scheduled.
Correct the legend for the schedule in the monthly status update.	Schedule legend has been updated
