

This action item summary will inform the Boards of the follow-up to the requests during April's Joint meeting.

Action Item	Status
Would like to integrate our comparison table of 2017 Project vs 2023 Project into our outreach materials for final EIR approval, referring to attached doc produced by EPP.	This effort is underway and will be completed with the completion of the Final EIR/EIS outreach materials.
Investigate appropriate frequency of loss assignment among Storage Partners (daily, monthly, seasonally, annually).	Will be addressed in the next update of the operations plan
Ensure that losses in the Colusa Basin Drain (currently assumed in ops modeling to be zero) are accounted for in the next update of the Operations Plan.	Will be addressed in the next update of the operations plan.
Work with Participants to efficiently identify a means by which to review alternative demand patterns. The intent is to arrive at an understanding of possible operating scenarios and potential operational limitations that may not be apparent with the current assumed demand patterns.	Coordinate with individual Participants as scenarios are requested and evaluate level of analysis needed.
Include an example of how losses would be calculated and applied in the next update of the Operations Plan.	Will be addressed in the next update of the operations plan.
