---

Hi,

It is a very exciting and promising project. I look forward to the outcomes.

I am submitting one comment below:

Hydrology will be significantly changing and therefore impacting hydraulic flows in the Sacramento River and its tributary area flooding issues. I don't see discussion regarding hydrologic changes in the executive summary or comparison between the 2017 and 2021 EIR. It will be great to see a section regarding hydrology issues in the 2021 EIR.

Thank you. Please let me know if you have any questions.

Regards,  
Erin
