To: EIR-EIS-Comments <eir-eis-comments@sitesproject.org>;

To whom it may concern,

I oppose the proposed Sites Project primarily because the users of the water won't pay for the project. It relies on "environmental" water benefits and public subsidies. Taking more natural high flows in the winter and diverting them to an off site reservoir north of the delta counters the wisdom of let nature be nature and she will do fine. The environmental benefits are contrived primarily because the benefits it claims for fisheries and the environment are caused by exporting water from the Delta.
